

Defense and Security
Custom solutions for your specific requirements

Patton's FiberPlex product line offers the latest solutions in data transmission protection and control systems, comprehensive security for critical infrastructures, video surveillance and video security, communications in command control centers and battlefield communications

Waveguides (WGF Series)

They provide a patented way of bringing pre-terminated fiber optic cables into a shielded enclosure while maintaining the enclosures radio frequency isolation integrity.

TDU-4000

The TDU provides protection for phones from being used as clandestine listening devices. The unit electrically disconnects the telephone line from the phone when the phone is in the "on hook" position.

Used for highly security applications

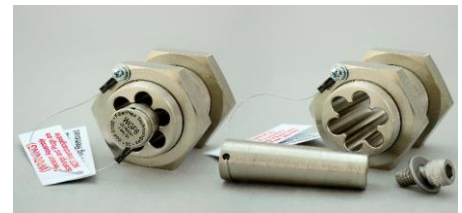

FOI-4451/4541

These units can be used in areas of high electrical noise or in and out of RF shielded enclosures.

TEMPEST tested and approved.

Applications in the defense market:

- SATCOM
- Navy communications
- TEMPEST
- Control Systems
- Expansion of existing infrastructure without pulling additional fiber
- Mission critical information systems
